

COMPATIBLE SMARTPHONES LEAFLET

SmartView Connect™ App Mobile

SYSTEM REQUIREMENTS

The SmartView Connect™ App Mobile has requirements for your phone and Operating System (OS) version. The app cannot transfer your heart device data if the requirements are not met. The requirements for your phone and OS version will change over time. You may need to update or replace your phone and OS to use the app to transfer data between your heart device and the SMARTVIEW™ system. Talk with your heart doctor for more monitoring options as needed.

The mobile app is compatible with **SAMSUNG** and **XIAOMI** phones featuring:

- **Android OS 11** or higher
- Screen size/resolution **5.8 inch** or higher
- **Bluetooth® 4.2** or higher

Check your phone's compatibility with the app in the Google Play Store.

RECOMMENDED SMARTPHONE MODELS

Popular mobile devices from supported brands are regularly tested to evaluate compatibility with the app and presented in the list below. This list will be updated as other devices and OS are evaluated.

Recommended mobile devices, and OS versions:

Brand	Recommended Models	Android Version 11.0 – 15.0
SAMSUNG	Samsung Galaxy A03s, A12, A20e, A40 Samsung Galaxy S10e, S20, S21 5G, S22, S23, S23 Ultra Samsung Galaxy M13, Samsung Galaxy Z Fold4 5G Samsung Galaxy Note 10	✓
XIAOMI	Xiaomi Redmi Note 9, 12	✓

Jailbroken/rooted devices and beta OS versions are not supported.

We recommended checking this list before using the app with a new phone. The latest version of this document is available at www.microportpatients.com.
